

**Comenius Regio - BEST PRACTICE**

<b>Partner region:</b>	Secondary Technical School Žďár nad Sázavou
<b>Mobility to:</b>	<b>The Champagne - Ardenne Region</b>
<b>Date:</b>	<b>January 10th – January 3rd, 2012</b>
<b>Observed school/institution:</b>	Rectorat of Reims
<b>Name: The Best Practice Example:</b> :	Information about job possibilities - project
<b>Description of the situation:</b>	The project is focused on informing pupils about professions and job opportunities in companies.
<b>Objectives of the used approach:</b>	<ul style="list-style-type: none"> <li>- The Rectorat has a contract with the company and orders from it actions related to the information on employment possibilities and the use of pupils in the labor market.</li> <li>- The school and all its pupils get the information about employment from the company.</li> <li>- The company will train teachers for acquiring new skills needed for teaching.</li> <li>- The company will train a team of teachers in the specialized field as required.</li> <li>- Pupils can have traineeship in the company or become familiar with the employment on excursions.</li> <li>- A career guidance program for pupils to choose technical professions.</li> <li>- Other activities include exhibitions about individual professions which are organized by the company outside the company in order to show what has been done in 3-4 schools and to introduce interesting fields and products</li> </ul>

	of the pupils' profession concerned.
<b>Your personal opinion on the chosen Best Practice Example:</b>	I like this activity because the pupils gain an overview on the employment possibilities in the firms and get an idea of what each profession includes. Companies teachers training is also very helpful (it is similar to our training within the project IQ industry).
<b>The possibility of implementation in the Czech Republic:</b>	<p>Training and internships of vocational teachers take place in the project IQ industry. The cooperation among technical schools and companies would be beneficial for basic school pupils choosing an appropriate secondary school and future career.</p> <p>To organise excursions into the firms for school pupils who do not have requirements for studying at vocational schools in order to become familiar with companies surroundings, their production program, the professions and the job involvement possibilities.</p> <p>We hold exhibitions of pupils school work in various fields within the open days at school. But it might be appropriate to present the products of the schoolwork on a regional level within the cooperation with other technical schools and firms.</p>
